

PRODUCT DATA SHEET

Logisan 30

Quick dry alcohol based sanitizer

Internationally
and
Independently
Tested

General Description

Logisan 30 was developed to meet international standards for blood-borne pathogens. **Logisan 30** is a blend of disinfectants and moisturizers, formulated to breakdown and prevent biofilm formation on the skin and to clean and sanitize hands without drying out the dermal layers of the skin.

Logisan 30 contains no dyes or perfumes that could contaminate food or leave residual odours while being safe when in contact with food or meat as well as the human skin and is recommended for use in the Food and Beverage Industry where there is physical contact between workers hands and processed or unprocessed food.

Logisan 30 during directed use forms a bacteriostatic film on the skin, which will kill a wide variety of microorganisms that are normally encountered in the biofilm, which is formed on the hands during the handling process.

Logisan 30's performance is unaffected by organic matter while hands can be treated on a frequent basis since an emollient has been added to the product in order to prevent the skin from drying out due to the loss of natural moisturizers.

Logisan 30 has been Internationally & Independently tested and assessed as safe for use in the food processing industry when used as directed.

Advantages and benefits

- Broad spectrum and fast acting.
- Stable product with extended shelf life expectancies
- Creates a Bacteriostatic Film on users hands
- Reduces cross contamination risks
- Assists in control of blood borne pathogens that may be present during processing
- Protects both product and personnel when used regularly

Usage recommendation

Preferably wash hands with an anti-bacterial hand soap.

Apply **Logisan 30** from a suitable dispenser with minimum hand contact on surfaces to avoid cross contamination.

Apply between 1 – 2 ml of **Logisan 30** to the hands and forearms – Rub into the skin until dry prior to re-entering the processing areas or contact with product.

Safety precautions

Logisan 30 is an alcohol based sanitiser

Avoid eye contact or inhalation of vapours.

Flammable-keep away from heat, sparks and open flames.

Store in a cool dry area, out of direct sunlight.
